

NOISE REDUCTION

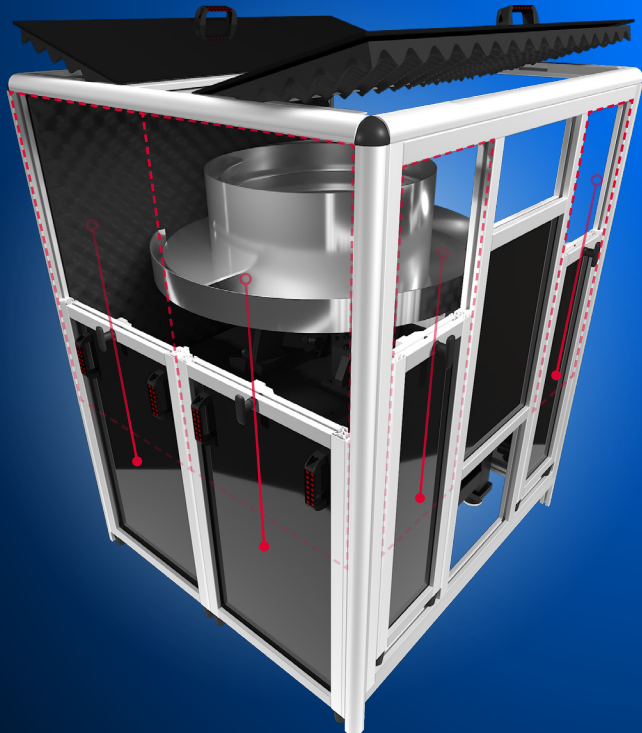

SOUND ENCLOSURES

The reduction of noise exposure in the workplace is vital to the health and safety of employees. Instead of modifying or replacing equipment, isolate the noise source from your production floor with custom designed enclosures from LinearGS.

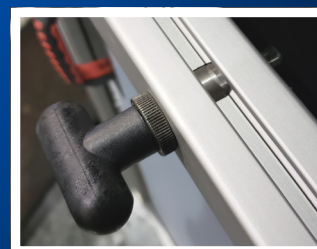

KEY FEATURES

- Panels slide down instead of swing open, making internal equipment easy to access in close quarters.
- When connected to a ventilation system, all dust and smoke will be contained.
- Customizable to meet your needs.
- Rear panel is a separate sub-structure to allow for easy maintenance of feed systems.

Panels slide and top panels fold open, allowing for easy access

Sound absorbing materials reduce noise by 15-20 dBA

Quick release pull handles make access fast and easy

Contact LinearGS to discuss how Sound Enclosures can reduce your shop floor noise.
